

2018-12-17 Minutes of PNDA Weekly Meeting

Attendees

- Alok Gupta
- Borislav Gluzman
- Carlos Giraldo
- Donald Hunter
- Fabien Andrieux
- Frank Brockners
- Jason Vecchio
- Kiran Ambardekar

LFN Board Update

The LFN Board had a meeting last week where all projects gave a status update. These are the slides that were presented to the board:

Future Development

We had a round-table discussion to get input on what people want from the project and what people would like to contribute to the project.

- Applications on PNDA – e.g. closed loop control in DCAE based on VES based analytics
- Containerisation of PNDA
- Kubernetes based deployment orchestration
- Minimal lightweight PNDA with no Hortonworks or Cloudera "Hadoop Provider" – instead deploying individual containerized Hadoop components.

We agreed the next step is to gather a definition of the minimum viable product (MVP) lightweight PNDA requirements then define an architecture that can deliver it.

Please contribute to the page here: [Minimum Lightweight PNDA Requirements](#)

Next Meeting

The next meeting will be on **Monday 7 January 2019**.

Frank mentioned that several of us will be at the [ONAP DDF and OPNFV PlugFest](#) during the week of **8 – 11 January** and anyone in the area is welcome to join us. There is a PNDA specific session on the agenda.
