

Design Proposals

We're in the process of migrating our design notes to this wiki as a series of PNDA Design Proposals. If you'd like to contribute then please contact one of the PNDA Maintainers.

For each proposal, please provide a motivation, description of the proposal, rough plan of action, note any interfaces and points of compatibility that are affected and finally document the alternatives that have been considered.

- [PDP-1: Endpoint management & service discovery](#)
- [PDP-2: Flexibility on ingest schema & format](#)
- [PDP-3: Support for Flink](#)
- [PDP-4: Support for Kylin](#)
- [PDP-5: Organization of PNDA CLI & creational repositories](#)
- [PDP-6: State & health in Application Management](#)
- [PDP-7: Securing PNDA](#)
- [PDP-8: Integrated Data Management](#)
- [PDP-9: Support for Druid](#)
- [PDP-10: Handling actions beyond start/stop on Applications](#)
- [PDP-11: Deploy PNDA on ESX](#)
